

SOURABH GUPTA

FULL-STACK DEVELOPER

My name is Sourabh Gupta, full-stack developer have good front-end as well as back-end skills and expertise to work on designing software. I not only develop apps but also design UI/UX, test and scrap them. I will seek any opportunity to improve my skills and knowledge along with the organisation objective. I do code in many programming languages and to me, they are like my back of the hand and always keep enhancing my skills with the never-ending thirst to learn. I will assure you of my full dedication towards the organisation and its objective.

Bootstrap
Django
BeautifulSoup
Selenium
Puppeteer
Android App
iOS App
Wordpress
Adobe Photoshop
Adobe Illustrator

EXPERIENCE

Programmer

TATA CONSULTANCY SERVICES

July 2019 - Present

In TCS, I have been part of a TCS internal project Digital Handloom 4.0 for Titan Taneira and John Wiley and Sons, Inc.

Handloom 4.0 is an AI-powered, on-the-cloud technology platform to design and create mass and customised handloom silk fabrics. I have worked on some modules of this project that consists of:

1. Designing the front-end web interface using HTML, CSS Flexbox and Javascript.
2. A javascript module to convert images into a text file containing ones and zeroes.
3. Django web app for crowdsourcing for patternification of weave motifs.
4. Scraping keywords for motifs to use on the filter section using BeautifulSoup.

Wiley is an American multinational publishing company founded in 1807 that focuses on academic publishing and instructional materials. The technologies I hav worked on there is as below:

1. A/B Testing of a wordpress website using Optimizely.
2. Designing the front-end web interface using HTML, Bootstrap, Javascript and APIs.

Android Developer Intern

SERVICE4STARTUP

Oct 2018 - Jan 2019

During my internship at startup4services now renamed as Utakrshini Edutech, I worked on one of their product i.e. Notify an Android app using Firebase as database built for students, where students can log in and see educational events happening nearby them. The working idea behind that was if one user knows about any events happening nearby them then they can post it on the app and other users at the same location can see those events. I not only worked on the android app but also designed their logo using adobe illustrator and splash screen using adobe photoshop.

EDUCATION

2016 - 2019

BACHELORS IN COMPUTER APPLICATION

Govt. Engineering College, Bikaner

2014 - 2016

HIGH SCHOOL

Kendriya Vidyalaya No.1, Bikaner

HOBBIES

Music

Swimming

Cricket

Blogger

Watching
